

Centennial College
Personal Support Worker Program
FINAL STUDENT PERFORMANCE APPRAISAL PSHS 125

Student Name: Sajjan Gautam

Student Number: 301534449

Semester: Second (2nd)

Name of Placement: SHN – Centenary site – 5East Rehab Unit

Clinical Instructor: Denise Lacey

Days/hours absent: 0

	Completed	Comments
Weekly Reflections Required by Final Evaluation- 4, 5, 7	NA	
Personal Organizational Plans (POP) Required by Final – 3, 4, 5	Y	
Preparation for Simulation Lab	NA	
Vital signs lab	Y	
If Required: P.I.P given: Y__ N <u> </u> Student Personal Improvement Plan Y__ N <u> </u>		Reason(s): I consistently demonstrated safe, competent, and professional practice throughout the clinical placement. I adhered to care plans and acted in a proper way, demonstrated high time and communication levels, and did not neglect feedback provided by my Clinical Instructor and care partners. I did not go outside my scope of practice, I consulted whenever necessary, and I demonstrated ongoing enhancement in my clinical practice and confidence.

Purpose of a Self-Evaluation

A student's progress toward meeting the course outcomes for the clinical portion of PSHS 125 requires a student to complete a self-evaluation. The student is to evaluate his/her level of performance with each criterion/indicator, indicating whether they are satisfactory, unsatisfactory, or needs progressing. Under each main heading, the student is to elaborate and give an example of how he/she met the criterion and/or how he/she will work to improve on the criterion.

Codes for Level of Performance related to Self-Reflection:

S - Developing competency and consistency

U - Unsatisfactory Performance (demonstrates unsafe practice)

PSHS 125-PSW Clinical Practice Evaluation

P - Progressing (needs improvement)

N/A= not applicable

Attendance Requirement

Attendance is mandatory during the clinical orientation, refresher labs, and simulation. Patterns of absenteeism or inconsistent attendance and punctuality in the clinical component of the program will affect students' learning, skill competency, and evaluation by the instructor.

A student who misses 10% or more of his/her total clinical hours will jeopardize his/her successful course completion. Students are responsible for missed course content since there is no opportunity to make up missed time.

**PERSONAL SUPPORT WORKER PROGRAM PSHS 125

completed the required clinical tasks / readings, assignments.	S	Remmert, 2022, pp. 45–48). I exercised appropriate responsibility in decision-making by seeking appropriate help of the Faculty Instructor or staff PSWs when I perceived a change in conditions like the onset of more pain or safety concerns that was beyond my professional scope of work (Wilk, Sorrentino, & Remmert, 2022, pp. 52–57). I came prepared to each clinical shift by reviewing care plans and completing required readings, and I ensured my practice followed established care plans, policies, and legislation to maintain client safety and well-being (Wilk, Sorrentino, & Remmert, 2022, pp. 299–302). I remained within my role boundaries and accepted responsibility for my actions.
Ensuring practice is consistent with established care plan, guidelines, and legislation.	S	
Taking action in situations where patient/resident/client safety and well-being are compromised.	S	
Maintaining competence and refraining from performing actions for which the PSW student is not competent.	S	
Taking responsibility for errors when they occur and taking appropriate action to maintain patient/resident/client safety.	S	

PSHS 125-PSW Clinical Practice Evaluation

Clinical Instructor Feedback:		
Knowledge & Skills Competence- <i>Demonstrates competence in professional judgments and practice decisions by...using knowledge from many sources. Engages in critical thinking to inform decision making which includes both systematic and analytical processes, along with reflective and critical processes (College of Nurses of Ontario, 2011).</i> EVALUATION INDICATORS/OBJECTIVES Safely with initial assistance, under direction and supervision The student demonstrates this by:	Student Self-Evaluation on S /U/ P/NA	Student's Comment Describe specific ways you are meeting this indicator &/or methods you will incorporate to improve upon this indicator. (Use your Mosby textbook to support your rationale/example)

PSHS 125-PSW Clinical Practice Evaluation

1. Identifies and makes observations related to the individualized resident/client/patient needs	S	I demonstrated knowledge and skills competence by identifying individualized client needs through ongoing observation, communication, and review of care plans, which supports person-centred care (Wilk, Sorrentino, & Remmert, 2022, pp. 52–57). I recognized client abilities and limitations across physical, psychosocial, cultural, and emotional domains, such as weakness, fatigue, pain, and personal preferences, and adjusted care accordingly (Wilk, Sorrentino, & Remmert, 2022, pp. 287–289). I respected client rights by maintaining dignity, privacy, and confidentiality while involving clients in care decisions and promoting independence whenever possible (Wilk, Sorrentino, & Remmert, 2022, pp. 299–302). I organized and revised my care plan priorities based on changing client

Safely with initial assistance under direction & supervision:		
v) cares for a client/resident/patient with a Colostomy.	S	I demonstrated competence in advanced elimination care by safely emptying urinary drainage bags, maintaining proper catheter tubing position, and monitoring urine characteristics such as color, clarity, and amount to detect abnormalities early (Wilk, Sorrentino, & Remmert, 2022, pp. 449–452). I maintained privacy, dignity, and infection control during catheter care and promptly reported concerns to the nurse. Even though direct colostomy care opportunities were limited, I demonstrated knowledge of stoma observation, skin integrity monitoring, and reporting responsibilities within the PSW role (Wilk, Sorrentino, & Remmert, 2022,
vi) cares for a client/resident /client with Incontinence.	S	
vii) participates in Urine/Stool Specimen collection.	N/A

oxygen that is in use.		pp. 361–366).
8. Promotes & assists client/resident/patient with Socialization/Rehabilitation/Leisure & Therapeutic Activities: Activities/Cognitive Stimulation: encourages, motivates and involves client/resident/patient in their interests and assists in implementation. Seeks resources as needed.	S	I also supported mobility needs by safely positioning and repositioning clients to maintain alignment and prevent pressure injuries. I assisted with transfers, ambulation, and walking using one-person or standby assist as per the care plan, and ensured wheelchairs, beds, and chairs were used
9. Assists in managing difficult behaviours of residents with cognitive impairment: uses therapeutic approaches, appropriate verbal & nonverbal communication environmental cueing.	S	safely with brakes applied and clear pathways (Wilk, Sorrentino, & Remmert, 2022, pp. 315–318). I supported clients using walkers and canes while monitoring tolerance and consistently applied proper body mechanics to protect both the client and myself (Wilk, Sorrentino, & Remmert, 2022, pp. 287–289). I assisted with active and passive range-of-motion exercises as directed to support joint mobility and rehabilitation goals. Measurement of TPR and oxygen administration were not performed independently but nonetheless I observed the nurse and practiced these

PSHS 125-PSW Clinical Practice Evaluation

		skills with peers, strengthening my understanding of correct technique and positioning to promote effective breathing when required (Wilk, Sorrentino, & Remmert, 2022, pp. 347–352). I also facilitated socialization through adopting dialogue and leisure and rehabilitation activities. In assisting those clients who had cognitive or behavioral issues, I communicated calmly, redirected, and used environmental cues to ensure their safety and minimize distress (Wilk, Sorrentino, & Remmert, 2022, pp. 299–302).

-recognizes possible causes of behaviour.	S	I demonstrated the ability to recognize possible causes of client behaviour by considering factors such as pain, fatigue, illness, environmental stressors, and emotional needs, and I remained aware of how my own behaviour and expectations could influence client responses (Wilk, Sorrentino, & Remmert, 2022, pp. 299–302). I did not have the opportunity to provide end-of-life care during this placement. However, I understand the importance of providing physical, psychosocial, and cultural support while maintaining dignity for both the client and family when applicable (Wilk, Sorrentino, & Remmert, 2022, pp. 509–513). I consistently observed clients objectively and reported any changes from baseline promptly to the appropriate staff to support early intervention and safety (Wilk, Sorrentino,
