Objective

Compassionate and detail-oriented Personal Support Worker graduate with a background in software development, bringing strong documentation discipline, accuracy, and a client-focused mindset into healthcare. Seeking to contribute to a long-term care or hospital setting by delivering safe, person-centered care, promoting independence, and maintaining high standards of communication, accountability, and professionalism.

Professional Summary

- Hands-on clinical and community placement experience in acute care and long-term care settings, delivering safe and respectful resident support.
- Proven ability to work in high-pressure, fast-paced environments while maintaining accuracy, organization, and strong attention to detail.
- Strong communicator with experience collaborating across teams and supporting individuals with diverse physical and cognitive needs.
- Combines healthcare training with a technical background, bringing structured thinking, precise documentation, and reliability to patient care.

Placement Experience

Clinical Placement

Jan 2026 – Mar 2026

Centenary Hospital — Scarborough Health Network

- Provided hands-on care in an acute care environment under clinical supervision.
- Assisted patients with ADLs while ensuring safety, dignity, and infection control standards.
- Observed and reported patient condition changes to nursing staff.
- Successfully completed midterm and final evaluations.

Community Placement

Mar 2026 – Apr 2026

Seven Oaks Long Term Care Home — City of Toronto

- Supported residents with daily living activities in a long-term care environment.
- Promoted independence, dignity, and emotional well-being through compassionate care.
- Maintained a clean, safe, and respectful living environment.

Skills Learned

- Assisted with Activities of Daily Living (ADLs): bathing, grooming, dressing, toileting, and feeding.
- Performed safe transfers using gait belts, wheelchairs, walkers, and mechanical lifts.
- Monitored and recorded vital signs including BP, temperature, pulse, and respiration.
- Applied IPAC standards and infection prevention protocols in clinical settings.
- Delivered dementia care using person-centered approaches and effective communication strategies.
- Maintained accurate documentation, charting, and incident reporting.

Professional Experience

Customer Service Representative (Part-Time)
Forum Research Inc., Toronto, ON

Jan 2024 – Aug 2024

- Assisted customers with survey completion, ensuring accurate and reliable data collection.
- Maintained and updated customer response databases with strong attention to detail.
- Worked efficiently in a high-volume, deadline-driven environment.
- Communicated clearly with team members to ensure consistency and workflow efficiency.

Skills Learned

- Data entry and database management with strong accuracy and consistency.
- Professional communication and active listening in client-facing environments.
- Time management and multitasking under pressure.
- Strong documentation habits and attention to detail transferable to healthcare charting.
