Hiring Team

Health Sciences North

Re: Personal Support Worker — Competition #10580, Oncology, Medical & Palliative Unit

Dear Hiring Manager,

I am writing to apply for the Personal Support Worker position (Competition #10580) within the Oncology, Medical & Palliative Unit at Health Sciences North. As a newly certified PSW through Centennial College with placement experience in both an acute care hospital and a long-term care home, I am drawn to this role because it combines the hospital-based setting I trained in with palliative-focused care I have direct experience delivering.

During my acute care placement at Centenary Hospital, Scarborough Health Network, I accomplished consistent, timely escalation of patient condition changes, measured by zero missed reports across my shifts, by closely monitoring vitals and communicating promptly with nursing staff on a fast-paced ward. In that same placement, I supported patients and families through end-of-life and palliative care, including Medical Assistance in Dying (MAID) support, measured by consistently upheld comfort and dignity for residents and their loved ones, by working alongside the interdisciplinary team while maintaining strict infection control (IPAC) protocols throughout. This is the experience I would bring directly into HSN's Oncology, Medical & Palliative Unit.

At Seven Oaks Long Term Care Home, I accomplished stable, dignified care for a complex resident population, measured by consistent de-escalation of responsive behaviors, by applying Gentle Persuasive Approach (GPA), validation, and redirection with 7 assigned residents daily in a 32-resident specialized dementia unit. I also maintained accurate, audit-ready documentation each shift, which reflects a strength I bring from an unconventional but relevant background: prior to my PSW training, I completed an AEC in Software Development at Vanier College. That technical foundation gives me an above-average comfort level with electronic health records and structured, precise charting — a combination the posting's documentation and communication requirements call for directly.

I hold current Standard First Aid & CPR certification, WHMIS, Vulnerable Sector Screening, and completed Worker Health and Safety Awareness in 4 Steps, and I am comfortable confirming equivalency of my CPR certification against HSN's BCLS requirement if needed. I am fluent in English and Nepali with additional proficiency in Mandarin and French, which I know is an asset in a hospital setting as diverse as HSN's. I am available to begin work immediately and would welcome the opportunity to discuss how my clinical placement experience and documentation background can support your Oncology, Medical & Palliative Unit.

Thank you for your consideration. I have attached my resume and would be glad to provide any additional information or attend an interview at your convenience.

Sincerely,

Sajjan Gautam
